Zaag Tech - Multi-Touch N Series Multi-Touch Overlays

True Multi-Touch Support - N Series multi-touch overlays support 2 or 4 touch points and multi-touch gestures. Unlike other technologies, ZaagTech N Series comes with simultaneous true multi-touch points.

Cost Effectiveness - Powered by ZaagTech's proprietary **HSIR+ (Hybrid Scattered Infrared Plus)** technology, N Series is a revolutionary product featured with admirable performance and affordable price.

Extraordinary Ambient light Immunity - **HSIR+** makes N Series the best performing IR multi-touch product ever in dealing with ambient light. ZaagTech N Series enjoys stable performance under light from any angles.

Enhanced Product Stability - Another salient benefit of **HSIR+** is amazing product stability. N Series has high range of tolerance for disturbing obstacles such as dust, it performs undisturbed even under extreme situations such as multiple LED failure.

High Response Rate - The rapid response within 7ms-13ms offers you the best interactive experience, effortless dragging and natural gesture recognition.

Low Power Consumption - With single USB connection as power requirement, N Series works perfectly even under laptop battery mode.

SPECIFICATIONS
